DETAILED ACTION

1. This office action is responsive to the communication on June 25, 2008; claims 4, 6-10, 12-18 are pending; claims 1-3, 5 and 11 have been canceled.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4, 6-10, 12-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP1260498 (EP'498).

EP'498 (paragraphs 266,272-277,282,284,286,288; examples 1, 24) discloses compositions of urea- urethane developers which are heat treated at 60 degrees C or lower. Examples 1 and 24 also have Ca carbonate as set forth in instant claim 7. Al oxide and Mg silicate may also be optionally present. Acid developers may also be optional present. It would at least be obvious to one skilled in the art to use the optional acidic developers, Al oxide or Mg silicate and to use heat during the disclosed grinding. The compositions of the instant claims are substantially the same as those of EP '498 even without heating in EP '498 since applicants' specification on page 30 discloses that heating at temperatures above 40 degrees for at least 3 hours is necessary to produce substantial change in the urea-urethane compositions while the instant claims include

heating at lower temperatures for any period of time and claims 4, 6, 7 and do not require any heating.

Response to Arguments

4. Applicant's arguments filed June 25, 2008 have been fully considered but they are not persuasive. The argument with respect to the limitation "wherein at least one composnent (a) and component (b) has subjected to heat treatment at a temperature of 40°C to 90°C" is not persuasive. The present invention is related to the claiming of a composition, while the limitation "'wherein at least one composnent (a) and component (b) has subjected to heat treatment at a temperature of 40°C to 90°C" is related to the a process for treating the dispersion of "urea-urethane" and the color inhibitor before the use thereof in the composition. There is no change in chemical structure of urea-urethane" and the color inhibitor even heat treated. Therefore, the composition taught in EP'498 is same or similar to that claimed in the present claimed invention. "(E)ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same or obvious from a product of prior art, the claim is unpatentable even though the prior art product was made by different process." In re Thorpe 777 F.2d 695, 698, 227 USPQ 694, 966 (Fed. Cir. 1985).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
